

High Quality Ingredients:

New Life Spectrum foods are made with high quality krill and herring providing highly digestible protein for your fish. Using the best sources (rather than cheaper fishmeals) leads to the minimum amount of waste, reduces the risk of tank/pond pollution, and encourages fish to seek the food out enthusiastically.

Balanced Diet:

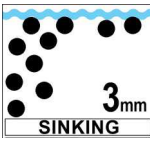

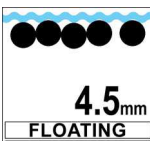

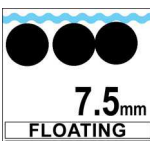

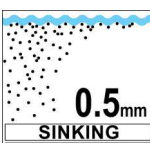

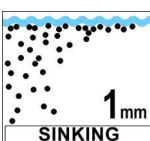

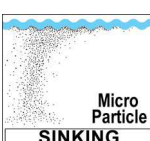

Feeding an exclusive diet of New Life Spectrum provides your fish with all the nutrients they require. The necessary minerals and vitamins are there too, including stabilised Vitamin C and Biotin. This comprehensive diet helps to maintain health and vitality, and provides essential elements found in the natural environment that are often missing from aquaria.

Beautiful Natural Colours:

Four all-natural colour-enhancing ingredients, including spirulina, help fish display their full spectrum of colouration. Try it for your own fish and see what a difference it can make! Intensify the natural reds on goldfish and koi.

Micro-granules to Jumbo Pellets:

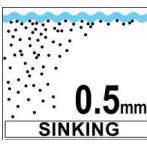

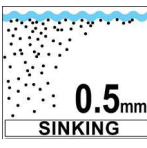

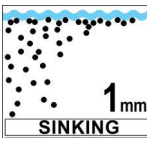

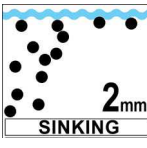

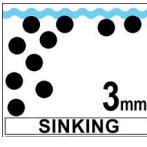

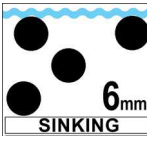

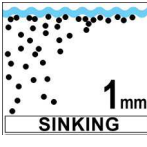

The increased density compared to typical flake and stick foods, ensures that fish get sufficient intake of nutrients for vigorous growth and health. Pellet sizes vary from micro-granules to jumbo pellets, all designed to break down slowly in the water and with minimised dust and fines to lower the risk of pollution. Micro Particle formula is specially suited to growing on fry.

<p>New Life Spectrum Goldfish Formula</p>			<p>Sizes Available 150g 300g</p>	<p>A daily balanced diet for all medium sized goldfish. The slow sinking pellet reduces the risk of indigestion or air bloat that can sometimes occur when fancy goldfish are fed on flake foods.</p>
<p>New Life Spectrum Koi Formula</p>			<p>375g 2240g</p>	<p>A balanced daily diet in two different sizes of floating pellet to suit medium or large koi. The high quality ingredients such as krill, herring and wheat germ, and natural colour enhancers including algae meal and spirulina, make this the perfect treat food for koi. Especially recommended during the run-up to showing koi.</p>
<p>New Life Spectrum Large Koi Formula</p>			<p>375g 2240g</p>	
<p>New Life Spectrum Small Fish Formula</p>			<p>75g 140g 275g 2270g</p>	<p>A balanced daily diet ideal for baby goldfish and koi in our readily taken 0.5mm micro-granule.</p>
<p>New Life Spectrum All Purpose Formula</p>			<p>80g 600g 2270g</p>	<p>A general, balanced daily diet for all fish. The 1mm micro-granules are ideal for smaller goldfish and young koi</p>
<p>New Life Spectrum H₂O Stable Wafers</p>			<p>70g 125g 250g 2240g</p>	<p>Provides long-lasting nourishment for grazing fish such as 'coldwater plecs' and fry. Stable for over 24hrs in water.</p>
<p>New Life Spectrum Small Fry Starter Formula</p>			<p>50g</p>	<p>A high protein (50%), high energy diet, in an easily digestible micro-particle, ideal for small fish fry</p>

Specialist Marine and Tropical Freshwater Diets are also available

New Life Spectrum – Goldfish and Koi Foods

<p>New Life Spectrum Grow Formula</p>			<p>80g 140g 275g 2270g</p>	<p>A high protein (50%) diet, rich in Omega-3 fatty acids, ideal for rapid growing-on of baby fish. Rapid early growth is vital for future jumbo koi.</p>

Common Questions:

How often should I feed New Life Spectrum?

Feed twice daily, the amount that fish are able to consume in one to two minutes. Fry are best fed smaller amounts on a more frequent basis.

Garlic?

All our foods contain garlic to help maintain a healthy immune system and protect against parasites.
